About Gaussians

Gaussians was founded on a simple belief: every organization deserves a trusted partner who understands both the challenges of running a business and the realities of managing cybersecurity, compliance, and risk in an increasingly complex world.

We know that behind every audit, security review, compliance requirement, or customer questionnaire is a leadership team trying to grow the business, protect its reputation, earn customer trust, and make the right decisions with limited time and resources. Having worked alongside organizations at different stages of growth, we understand these pressures because we have lived them with our clients.

That understanding shapes the way we work.

At Gaussians, we do not see ourselves as an external consulting firm delivering reports and recommendations. We see ourselves as partners in our clients' journey. We work alongside leadership teams, security teams, compliance functions, auditors, and operational stakeholders to build trust, strengthen resilience, and create programs that support long-term business success.

Since our inception in 2021, we have grown from a founder-led vision into a team of dedicated professionals supporting organizations across global markets. Over the years, we have helped clients establish and mature cybersecurity, governance, risk, compliance, and assurance programs while building scalable operating models that continue to deliver value long after individual projects have concluded.

What makes Gaussians special is our people.

Our team brings together experienced professionals with diverse backgrounds across cybersecurity, governance, risk management, compliance, assurance, privacy, and technology advisory. Beyond technical expertise, our people are known for their curiosity, accountability, professionalism, and commitment to client success. We take pride in building teams that clients trust—not only for their knowledge, but for their ability to listen, collaborate, and deliver.

We believe that successful partnerships are built on **strong values.**

Integrity guides every decision we make. **Transparency** ensures our clients always know where they stand. **Ownership** drives us to remain accountable for outcomes, not just activities. **Excellence** pushes us to continually raise the standard of our work. Above all, we measure our success through the **success of our clients.**

Today, Gaussians combines strategic advisory, operational support, managed services, and specialist talent solutions to help organizations navigate change, manage risk, strengthen trust, and achieve their goals with confidence.

Our journey continues to evolve, but our purpose remains unchanged: to be the trusted partner organizations rely on when security, compliance, risk, and trust matter most.

Global Presence

Supporting organizations across global markets with trusted expertise in cybersecurity, compliance, governance, and assurance.

Our flexible delivery model enables us to work seamlessly across regions, time zones, and operating environments through offshore, remote, hybrid, and embedded team structures—providing clients with experienced professionals, scalable support, and strong accountability.

Wherever our clients operate, our focus remains the same: strengthening trust, managing risk, and delivering outcomes.

Leadership and Subject Matter Experts

Gaussians is led by experienced professionals who have spent their careers helping organizations navigate cybersecurity, compliance, governance, risk, and assurance challenges in complex and rapidly evolving business environments.

Our leadership team combines deep subject matter expertise with hands-on operational experience, having supported organizations ranging from high-growth startups to established global enterprises. Beyond advisory services, our leaders have built and scaled teams, established centers of excellence, managed large-scale compliance and risk programs, and partnered closely with business leaders to drive meaningful outcomes.

What sets our leadership apart is a commitment to staying connected to both our clients and our teams. We believe the best solutions come from understanding business realities, working collaboratively, and remaining accountable from strategy through execution.

At Gaussians, leadership is measured not only by expertise, but by the trust we earn, the people we develop, and the outcomes we help our clients achieve.

Testimonials

Our clients value Gaussians for our practical approach, clear communication, and commitment to quality.

We work closely with teams to understand their challenges, simplify complex requirements, and deliver support that is reliable and easy to act on. Whether we are supporting an audit, reviewing controls, helping with compliance readiness, or advising on risk remediation, our focus remains the same: to make the process smoother, clearer, and more valuable.

“Gaussians helped us bring structure and clarity to our compliance journey. Their team was responsive, knowledgeable, and practical in their approach. They understood our business needs and supported us throughout the process with clear guidance and high-quality documentation.”

“Working with Gaussians gave our team the confidence to manage audit requirements more effectively. Their ability to simplify complex control expectations and provide actionable recommendations made a real difference.”

Client Success Story

Building a Stronger IT GRC and Third-Party Risk Program

A growing technology business wanted to strengthen its IT governance, risk, and compliance structure while also improving the way it managed third-party security assessments.

Gaussians supported the organization by helping establish IT GRC processes, develop policies and procedures, design a risk and control framework, validate controls, and support audit readiness activities. The team also assisted with third-party risk assessments, documentation reviews, issue tracking, quality checks, and ongoing communication with key stakeholders.

The engagement helped the organization bring more structure, consistency, and accountability to its compliance and risk management activities. It also supported better visibility into control gaps, remediation progress, and third-party risk exposure.
